I'm starting to think it has something to do with the firmware. I tether everyday on a JB 4.0.1 (MyWi) and haven't received any messages. I'm thinking something was implemented in a later firmware that allows AT&T to check tethering. iPad Magic I have been using the beta 2, beta 3, and the GM Seed of 4.2 on both my iPhone 4 and iPad, and have used AirPrint just fine, it just seems another Apple hater has started a rumor and the media have made it into a frenzied panic! It is there, it does work perfectly well, however i am waiting for an update of the iWork Apps. It does however work fine using Safari ĩ½C i printed off some PDF docs i needed.I managed to get it working by sharing my Smasung CLN-310N

via my Windows 7 system. If it asks for user and password you need to enable the guest account (a bit annoying but thats windows for you!)

Ashton then attacked the defense contention that Caylee drowned and that George Anthony helped Casey Anthony cover it up. No one faced with an accidental drowning would do that instead of calling 911, Ashton said.DivX Convertidor Mac It is a trip down a rabbit hole into a bizarre world where men who love their granddaughters find them drowned and do nothing," Ashton said. "Where men who love their granddaughters take an accident, a completely innocent act, and make it look like a murder for no reason. A world where a man who buries his pets will take the granddaughter who was the love of his life and throw her in a swamp." M4V Convertidor Mac
