My iPhone has gotten even more worse, it constantly crashes and freezes now and when it is in sleep mode it will make the charging sound constantly, and when it is plugged in the wall it won't charge sometimes. The headphone jack constantly glitches out and will plays out of the speakers or vice versa, there are so many problems, it is partially the hardware and ow old my iPhone 3g is now but still it's gotten even worse since the update. sansa converter Thanks for the detailed comparison and review of the white iPhone 4. i must say the iPhone craze has reached a new level. With just a launch of almost the exact same phone in a new colour, it has got people around the world discussing about it. Some eagerly anticipating and waiting for the launch. As for myself, i will wait for the iPhone 5!                  
